

PROFESSIONAL & LEADERSHIP DEVELOPMENT

West Wind offers leadership development and coaching for teachers, teacher leaders, staff, administrators, school boards, and others. We also provide targeted professional development, coaching, and consultations to district-level school leaders and staff, focused on understanding and incorporating equity into regular team functions and overall district policies and practices.

We tailor our coaching to the specific needs of your community and focus on growing the Equity AgencySM of educators and developing Systemic Equity AgencySM for education leaders.

Systemic Equity AgencySM is the ability to lead, facilitate, and coach others to make changes that result in more equitable environments, experiences, and outcomes for all. Our framework fosters skills to identify and disrupt systemic inequities.

Dependent on your needs, our Professional & Leadership Development programming can include the following services:

- addressing strategic planning through an equity lens and identifying and addressing equity-focused problems of practice;
- developing intentional policy-practice feedback loops and engaging in Equity Improvement Cycles; and
- professional learning designed for your local context and needs, ranging from individual workshops to comprehensive multi-year training programs for teachers, staff, and leaders.
